**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/US2004/017102

1. The application does not meet the requirements of Article 6 PCT, because claim 12 is not clear. It is not clear whether claim 12 is an independent or dependent claim since there is no reference to an independent claim.
2. Although claims 1, 2, 11, 12 (?) and 13 have been drafted as separate independent claims, they appear to relate effectively to the same subject-matter and to differ from each other only with regard to the definition of the subject-matter for which protection is sought. The aforementioned claims therefore lack conciseness and as such do not meet the requirements of Article 6 PCT.
3. The documents D1 (EP-A-1 308 442), D2 (EP-A-1 002 575) and D3 (EP-A-1 086 743) (see cited passages in the search report, examples) all disclose a modified carrier/catalyst and method of making the same by impregnating a preformed alpha-alumina carrier (= any commercially available alpha alumina, see p. 5, l. 8-9) a) with an alkali metal hydroxide, b) drying, c) calcining said dried carrier and d) washing said calcined carrier (and e) depositing silver catalytic material on said carrier).

The present application does therefore not meet the criteria of Article 33(1) PCT, because the subject-matter of claims 1-15 is not new in the sense of Article 33(2) PCT.
